### **REASONS FOR ALLOWANCE**

The following is an examiner's statement of reasons for allowance: The primary reason for allowance is that the prior art does not teach or fairly suggest a process for hydrogenation of unsaturated hydrocarbons without hydrogenating ethylene and propylene by using a catalytic distillation column to produce a bottom stream containing primarily C<sub>6</sub> and heavier hydrocarbons and some C<sub>5</sub>, C<sub>4</sub>, C<sub>3</sub>, and C<sub>2</sub> unsaturated hydrocarbons wherein the first bottoms stream is maintained at a temperature of less than 200° C and the first column is operated at a first pressure. Passing the first bottom stream into a second column comprising a fractionation column operating a second pressure lower than the first pressure and the second column is operated to produce a second bottom stream which is maintained at a temperature less than 200° C.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
